PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in data analysis, exploratory data analysis (EDA), SQL, Python, data cleaning, ETL, feature engineering, dashboard development, and machine learning. Experienced in working with large datasets, building Power BI and Tableau dashboards, and applying statistical and machine learning techniques to derive actionable insights. Seeking an entry-level Data Analyst or Data Science role.

TECHNICAL SKILLS

Programming: Python, SQL, C, HTML

Data Analysis: Pandas, NumPy, Scikit-learn, Data Cleaning, EDA, Feature Engineering, Statistical Analysis

Databases: MySQL, SQL

Visualization & BI: Power BI, Tableau, Advanced Excel, Power Pivot, Dashboards, Matplotlib

Machine Learning: Classification, Regression, Logistic Regression, PCA, ANN (MLP), XGBoost, Oversampling, Robust Scaling, Dimensionality Reduction

Tools: Jupyter Notebook, Git, ETL

PROFESSIONAL EXPERIENCE

Data Science Consultant Intern — Rubixe_AI, Bengaluru | Jul 2025 – Dec 2025

- Performed exploratory data analysis (EDA) on large-scale datasets using Python and SQL to identify trends, patterns, and actionable insights.
- Built interactive Power BI and Tableau dashboards to visualize key business metrics and support data-driven decision-making.
- Performed data cleaning, transformation, ETL, and feature engineering to prepare structured datasets for predictive modeling and machine learning.

Salesforce Developer Virtual Intern — SmartInternz | Oct 2023 – Nov 2023

- Used Apex, SOQL, and Salesforce declarative tools including Flows and Process Builder to customize CRM functionality.

PROJECTS

Rainfall Prediction Using Machine Learning

- Developed a machine learning model to predict rainfall using historical weather data and features including temperature, humidity, and pressure.
- Performed data preprocessing, missing-value handling, feature selection, and model evaluation to improve predictive performance.
- Implemented machine learning techniques for rainfall prediction and evaluated model performance using regression metrics.

Customer Transaction Prediction — Data Science Project

- Developed a binary classification model using 200K+ records to predict customer transactions.

- Applied data preprocessing, oversampling, Robust Scaling, statistical analysis, and PCA for dimensionality reduction.
- Built Logistic Regression, ANN (MLP), and XGBoost models, achieving approximately 90% accuracy and F1-score.

EDUCATION

B.Tech, Computer Science & Engineering — Kallam Haranadhareddy Institute of Technology, JNTU Kakinada | Sep 2021 – Jul 2025 | CGPA: 6.8

Intermediate (MPC) — Sri Chaitanya Junior College, AP Board | Jul 2019 – May 2021 | 67.6%

SSC — Santhan High School, AP Board | Jun 2018 – Mar 2019 | GPA: 8.0

CERTIFICATIONS

- Operating Systems Fundamentals — NPTEL
- Certified Data Scientist — NASSCOM
- Data Science Foundation — IABAC

LANGUAGES

English — Professional | Hindi — Intermediate | Telugu — Native
